

# Clean Label Inclusions

The Food Industry continues to move towards more “natural” and “clean labeled” products and away from those containing any artificial or synthetic ingredients. In response to the growing market demand, Inclusion Technologies has been developing more of their custom inclusions using natural flavors and colors.

In the Bits-O-Flavor® line, we now have nuggets, flakes, and coated sugars in a variety of shapes and sizes made with only natural colors and flavors. These products are all made in our SQF Level 3 certified nut-free facility, and they can also be made without any allergens and some of them in a non-GMO format. The following flavors are now available:

- Apple
- Bacon (Sweet)
- Banana
- Blueberry
- Caramel
- Chocolate
- Cinnamon
- Lemon
- Maple
- Marshmallow (Vanilla)
- Peach
- Pineapple
- Strawberry
- Sweet Potato

As always, the options with these customized inclusions are limitless and we can design them to meet your exact functionality and labeling requirements based upon your specific application and market positioning.

In the Nadanut® line, we now have both a traditional and non-GMO offering, with some recipes Non-GMO Project Verified\*:

- Plain (Unflavored)\*
- Almond\*
- Hazelnut\*
- Macadamia
- Peanut\*
- Pecan
- Walnut

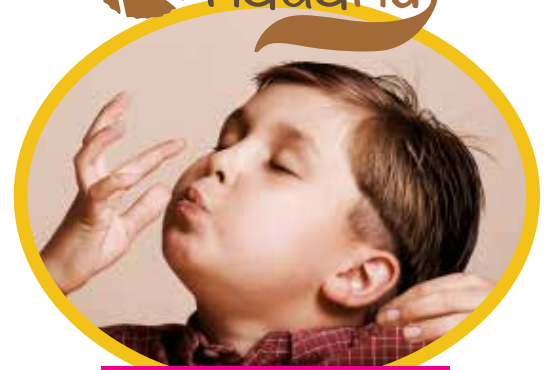

If you want the look, taste, and crunch of a real tree nut but without the nut allergens or high cost, then Nadanut® is an ideal solution. With the continued expansion of the nut-free market and “community”, with Nadanut® now your customers CAN have your nuts, AND eat them too!!
